Trade-marks Journal

Vol. 65 No. 3317

General Information

The *Trade-marks Journal* is published every week in compliance with Rule 15 of the *Trade-marks Regulations*. The Registrar of Trade-marks cannot guarantee the accuracy of this publication, nor assume any responsibility for errors or omissions or the consequence of these. All mail relating to trademarks should be addressed to the Registrar of Trade-marks, 50 Victoria Street, Gatineau, Quebec, Canada, K1A 0C9.

Electronic *Trade-marks Journal*

The *Trade-marks Journal* is available in electronic form on the CIPO web site (http://cipo.gc.ca). The *Journal* is available in PDF format and can be downloaded free of charge, viewed and printed with Adobe Acrobat Reader. The electronic form of the *Trade-marks Journal* is the official version.

The *Journal* is also available in a printable HTML format as an alternate official version, and contains a search function to narrow and customize the *Journal* content to user defined areas of interest.

Official Languages

The *Journal* is available in English and in French. The application details are displayed based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the Journal are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the Journal have been translated. Any registration resulting from the application will be restricted to these goods or services described therein.

Filing Dates

The filing date of each trademark application advertised in the *Trade-marks Journal*, including those to extend the statement of goods or services of an existing registration, is shown next to the application number in the sequence of Year, Month and Day.

Nice Classification

The *Journal* includes reference to the Nice classification when the goods or services of an application have been grouped and classed by the applicant in accordance with the current version and edition of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Trade-marks Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Trade-marks Journal* may file a statement of opposition with the Registrar of Trade-marks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

The right to the exclusive use of the words OEM DIRECT PARTS is disclaimed apart from the trade-mark.

Goods

Electric motors for machines; electric motors for fans and axial or rotary blowers; blower modules and blower systems, comprised primarily of axial or rotary blowers and blower motors; fan systems, comprised primarily of fans and fan motors; motors for door locks and door closers; motors for fuel pumps and fuel injection installations, other than for land vehicles, namely motors for fuel pumps for engines and fuel injection systems for engines; linear, electronic, pneumatic and hydraulic engine actuators, namely, throttle valves, idle speed controllers, linear actuators, air regulating valves, air damper actuators and exhaust gas recirculation valves; fuel supply units consisting predominantly of pumps, swirl pots, fuel rails, and injection valves; fuel mixture processing equipment, namely, fuel and air mixture regulators, fuel valves, and fuel nozzles being parts of internal combustion engines; fuel injection modules, fuel injectors, and fuel injector parts; compressed air pumps; electronic control systems for internal combustion engines for motor vehicles, namely, electronic ignition systems consisting of ignition devices, ignition cables and ignition electrodes; mechanical rotational speed regulators for motors and engines; hydraulic and pneumatic actuators; mechanical actuators, namely linear actuators, for land vehicles; scientific, nautical, surveying, electrical, mechanical, electromechanical and optical weighing, measuring, signaling, checking in the nature of supervision, regulating and controlling apparatus and instruments, namely, ammeters, voltmeters, ohmmeters, manometers, thermometers, tachometers; apparatus and instruments for vehicles for measuring and displaying exhaust gas temperature, distance, acceleration, rotational speed, torque, yaw rate, pressure, liquid level, in particular fuel level and windscreen washer liquid level, filling level, speed, height, cooling water temperature, boost pressure, power, air quality, mass airflow, oil level, oil pressure, position, rudder angle, temperature, path, distance, and wind and water depth; sensors for determining load on an axle, car alarms, proximity sensors for vehicles for checking the presence of persons; proximity sensors and automatic collision avoidance controllers for vehicles; anti-theft alarms for vehicles; electrical anti-theft installations for vehicles; tachometer with high speed indicator for vehicles; radio receivers and transmitters; driver drowsiness detection and warning indicator for vehicles; electronic speed controllers for vehicles; visible and audible speed warning indicators for vehicles; data processing equipment, namely computer hardware; navigation apparatus for vehicles in the form of on-board computers, electronic idle speed controllers, multimedia players for vehicles, namely, media players, for the storage, transmission and representation of text, graphics, images, audio and video, namely players for CDs, DVDs, cassette tapes, videotapes, downloadable audio and video files, and streaming audio and video files; position finding apparatus, namely, global positioning systems (GPS) consisting of computers, computer software, transmitters, receivers, and network interface devices; electronic diagnostic testing machines for motor vehicles; rudder angle indicators, automatic indicators of low pressure in vehicle tires; reversing alarms for vehicles, visible indicator displays of vehicle service due; telematics apparatus, namely, computer hardware and software integrated with mobile telephone wireless communication devices for providing telematics services; mobile telephones, tire and brake part wear indicators for vehicles; fluid consumption meters for vehicles, maintenance indicators for vehicles, vehicle service diagnostic testing machines for use in vehicle repair and maintenance shops, odometers, time clocks, electronic controls for window winding apparatus for motor vehicles; electrical controllers for opening and closing automobile convertible tops and automobile sun roofs and sun screens; electrical controllers for motor vehicle central electronic lock assemblies; remote controls for vehicle central locking systems, electronic immobilizers for motor vehicles; electric, electronic, optoelectronic, mechanical, analog and digital display apparatus, instruments, and modules for vehicles, namely, electronic display boards, electronic display screens, electronic display interfaces, video monitors, video screens, liquid crystal displays, flat panel display screens; computer software and hardware for the transmission and reproduction of images for vehicles, liquid crystal displays for vehicles, flat panel display screens for vehicles, video screens and monitors for vehicles; solenoid valves; fuel cells; fuel cell installations for use with reactors, membranes, electrodes, anodes, cathodes, catalysts, electricity generators, hydrogen generators, valves, cables, sensors, in particular for gas concentration, moisture separators, heating/cooling apparatus, pumps, and containers for preparation and storage of fuel or components thereof; temperature detection and control apparatus for water cooling installations; electronic driver and vehicle information systems, namely, display instruments for vehicles, namely, electric control panels, optical display panels, video or picture display monitors, optical display screens, LCD displays, flat panel displays, video screens, video monitors, computer display screens, digital and analog gauges, multiplexers, accident data recorders, combination instruments, namely, devices for indicating, measuring, controlling and supervising the operation of land-, water-, and air-vehicles, namely, speedometers, acceleration meters, mileage meters, tachographs, revolution counters, pressure gauges, time clocks, thermometers, liquid level indicators, consumption meters, power meters, ammeters, volt meters, ohmmeters, time meters, board meters, and parking meters, tachographs, service interval indicators, electronic sensors for motor vehicle instrumentation, and wiring harnesses; control panels for information management, namely, control switches and display panels, on-board computers, multiplexers, human-machine interfaces, accident data recorders, bus systems, namely, multiplexers for use in motor vehicles, electronic controls and control systems consisting predominantly of switches, control panels; electronic sensors and systems consisting thereof for windscreen washer controls; electronic sensors for vehicle instrumentation; motor control and motor regulating systems for internal combustion engines for motor vehicles, namely controllers and regulators for idle speed, vehicle speed limit, and rotational speed; electric gas pedal controllers and regulators; electronic monitoring and diagnostic apparatus and systems primarily consisting thereof for engines and drive trains in vehicles; automatic steering apparatus for vehicles, namely, electric and electro-hydraulic steering aids; electric batteries for vehicles; accumulators for motor vehicles; recorders, receivers, transmitters, audio speakers and video screens for recording, receiving, transmission and reproduction of analog and/or digital signals, or sound and images, for motor vehicles; antennas; radios; television sets for vehicles, telephones, including video telephones; touchscreens; fuel delivery units, namely fuel fill level sensors and fuel level indicators; electric control panels for vehicles, electroluminescent display panels for vehicle instrumentation; driver workstations consisting of instrument panels, displays, switches, buttons, electronic illuminated display panels, dashboard instrument panels, and wiring harnesses; on-board vehicular safety surveillance systems comprised of cameras and monitors and related computer hardware and software for providing driver visibility of blind spots around the vehicle; video monitors, video cameras; electrical cables, electronic actuators for central locking systems for land vehicles; electric and electronic actuators for land vehicles; structural parts for vehicles for locomotion by land, air or water, namely, automobiles, trucks, buses, motorcycles, boats, tractors, earth moving machines, locomotives, airplanes, helicopters, trains, aircraft; parts and fittings for vehicles for locomotion by land, air or water, namely, metal and non-metal interior and exterior trim, wire harnesses, namely, wires, terminals and connectors bundled together to transmit electric power and signals to electric or electronic equipment mounted on the body parts of vehicles; transmission shafts and electric motors for land vehicles; parts for land vehicles, namely, cockpits, center consoles, interior paneling, cockpit transverse members; driver's workplaces consisting of a pitman arm, steering column, steering wheel and ignition lock; driver's cabs for vehicles; hydraulic steering aids, steering columns, steering gears for vehicles; heating, ventilation, and air conditioning (HVAC) nozzles and hoses for connecting HVAC systems to the dashboards; windshield and headlight cleaning systems for motor vehicles, namely, containers adapted therefor, nozzles, hoses, hose couplings, filters, pumps and valves therefor; fuel lines and fuel rails for vehicles;

mechanisms for opening and closing vehicle windows, tailgates, sliding roofs, sunscreen devices and convertible tops; air pumps for vehicle tires; accelerator pedals, namely electric gas pedals in the form of electronic controls.

(3) Scientific, optical, weighing, measuring, checking and inspection apparatus and instruments, namely apparatus and instruments for verifying and monitoring the functioning of aircraft motors and engines and their constituent parts, namely apparatus enabling the visual monitoring of parts, namely scanners, chemical fume detectors, radiographic apparatus for industrial use for analyzing materials and metals, namely scanners, variable-angle image detectors, touch screen displays, laser detectors, cameras, radiation detectors, camera adapters, camera batteries, digital cameras, camera memory cards, camera battery chargers, camera filters, waterproof packing for camera cases, camera flashes, camera lenses, camera shutters, camera lens hoods, camera mounts, camera tripods, laser pointers, altimeters, anemometers, variometers, accelerometers, aerodynamic sensors, electrical and electronic apparatus and instruments, in the nature of overhaul calculators, calculators for digitally regulating speed and fuel flow (FADEC), calculators for braking, temperature, pressure, vibration analysis, flight control, electric, electronic and

magnetic sensors for pressure, speed, movement, temperature, position, vibration, electronic parameter processing cards, namely reading cards to be used with computers for connecting to a computer server for information in the fields of aeronautics and space, electronic systems and equipment, integrated or not, for data processing and acquisition, namely sensors, regulators, converters, transformers, calculators in the fields of aeronautics and space, calculation and operation software for simulating the, operation and storage of test programs, surveillance systems consisting of computer hardware and software for evaluating security and performance as well as maintenance and servicing requirements for aircraft engines and/or their modules and parts, electric and electronic maintenance and control materials and equipment (integrated into airplanes or motors and engines, mounted on test benches or portable for ground interventions) for reading and interpreting data from calculators and sensors, information processing apparatus, namely computers, computer keyboards, computer screens, mice, printers, modems, telephones, cellular telephones, apparatus for the recording, transmission, reproduction of sound, images and data, namely audio and video disc players, audio and video disc recorders, radios, audio and video receivers, televisions, computer software, in particular computer software and programs providing information about aircraft engines, the functioning, maintenance, intervention, repair related to aircraft engines and/or their modules and parts, computer software for managing the functioning and repair, servicing, maintenance, overhaul and reconditioning operations performed on aircraft engines and/or their modules and parts, magnetic, optical and digital recording media, namely discs, video discs, optical discs, CD-ROMs, DVDs, laser discs, USB keys, data banks, containing, in particular, information regarding aircraft engines, their functioning, repair, servicing, maintenance, overhaul and reconditioning of engines, modules and parts of aircraft engines, test benches for aircraft engines, turbines and thrusters, all the aforesaid goods used in or intended for the fields of aeronautics and space.

Class 12

(4) Aircraft, space vehicles, satellites; constituent parts and pieces for the aforementioned products.

SERVICES

Class 37

(1) Repair and maintenance of aeronautical and astronautical vehicles, space launchers, aircraft and their constituent parts, including propulsion systems for aeronautical vehicles, motors and engines, thrusters, nacelles, thrust reversers; construction of industrial buildings and test benches (permanent buildings with reduced dimensions or not) for propulsion units, systems (rocket engines and aircraft engines), equipment and parts of aeronautical and space vehicles, and rocket engines; repair and reconditioning of aeronautical engines and space propulsion units; standardization, reconditioning, and standard replacement for engines, propulsion units, systems, equipment, and parts for aeronautical and space vehicles; consulting and technical support services related to the maintenance, repair, and servicing of aeronautical vehicles and their constituent parts, including nacelles motors and engines, reactors, thrusters or thrust reversers.

Class 40

(2) Treatment of materials, in particular mechanical and chemical treatment, heat treatment and material surface treatment in the fields of aeronautics and space; assembly of motors and engines and full propulsion systems and their subassemblies.

Class 42

(3) Material testing; test bench services for engines, full propulsion systems and their subassemblies; technical data analysis in the fields of aeronautics and space; technical, scientific and industrial research in the fields of aeronautics and space; computer programming;

development (design) of computer software in the fields of aeronautics and space; engineering services related to evaluations, estimates and research in relation to the technology used in aeronautical and space vehicle systems, equipment and parts; consulting and professional advice related to engineering; engineering work, namely technical consulting in the fields of aeronautics and space; engineering, research and development related to aerodynamics, turbomachinery, high-temperature metallurgy, special industrial brewing processes, welding techniques, laser applications and data acquisition systems for test benches.

Class 09

(1) Equipment and instruments for guidance, command guidance, automatic piloting in the field of aviation, namely electronic systems for aircraft communication, navigation, speed holding, turning handling, static pressure; equipment and instruments for radio-electric localization and localization via satellite of air vehicles, land vehicles, sea vehicles and space vehicles; gyrometers; sensors, namely gyroscopes, accelerometers; navigation compasses; gyroscope resetting apparatus using altitude correlation, namely aircraft navigation apparatus, namely inertial navigation systems, namely acceleration and rotation sensors used for determining the absolute movement of a vehicle, namely airplanes, missiles, submarines, ships, gyroscopes, GPS receivers; systems for inertial and hybrid navigation; odometers, apparatus for measuring speed, namely Doppler radars; pilot helmets and equipment for visualization for civilian and military use, namely optoelectronic and gyroscopic equipment; equipment for the preparation, follow-up and restitution of land, air and sea vehicle missions, namely electrical and electronic apparatus for trapping, recording, transmitting and analyzing data, images and information; digital mapping apparatus, namely computer programs for use in digital mapping; digital bus management equipment, namely portable electronic platform; mission calculators; equipment for head-up display for military aircraft, namely pilot helmets, inclined pilot seats, controller grips for piloting, throttle sticks, liquid crystal displays for piloting, viewing screens for piloting; range finders; air data computers, namely basic weather instruments for wind speed measurement; radio altimeter; data transfer case for airplane apparatus; instruments, machines and devices for aeronautics, namely machines for producing parts for use in turbojet, ramjet and pulse-jet engines; equipment and instruments for guidance, command guidance, automatic piloting in the field of aviation, namely electronic systems for aircraft communication, navigation, speed handling, turn handling, static pressure; Aircraft Condition Monitoring Systems (ACMS), namely apparatus, instruments and equipment for the collection of data for airplane flight data management assistance; data analysis station (analysed ground station), namely apparatus, instruments and equipment for the analysis and the processing of airplane technical and scientific data; cockpit control systems; sensors, namely gyroscopes, accelerometers; control systems for leading edge flaps and flaps; actuators for brake and thrust reverser controls; horizontal plan control systems in; electric distribution systems, namely gas generators and gas turbines for armoured vehicles; electrical converters; systems for controlling automatic helicopter flights; flight control calculators; trim systems, namely automatic or manual

flight control systems for aircrafts capable of remotely controlling main steering vanes; actuators for piloting for airplanes; inertial attitude and heading reference systems, namely inertial flight navigation instruments consisting of accelerometers and gyroscopes; airplane flight data acquisition systems, namely computer software; optical apparatus, equipment and instruments for scientific applications, navigation, guidance, piloting, stabilization of air, land, sea and space vehicles, namely telescopes, camera lenses, mirrors, optical filters, sun-shades, lasers, lenses, targets; apparatus and instruments for space optics, namely telescopes, field of view correctors and atmospheric dispersion compensators; optical apparatus and instruments for air reconnaissance, namely location and spatial filtrating lenses, infrared analyzers, helmet-mounted sights for pilots, missile detectors, cameras for airplanes and helicopters; semi and superconducter components intended for infrared detection; high-precision optical devices, namely motion detectors and high-precision radars for airborne and land surveillance; micro water coolers, micro air coolers; piezoelectric scanners; infrared cameras; video cameras; equipment and apparatus for optical or infrared detection for military and civilian vehicles, namely radars, sensors; equipment and apparatus for optical and infrared detection outside of biometric applications, namely radars, sensors; equipment and apparatus for fire control, namely inertial navigators for armed airplanes; thermal imagers; observation systems for military and civilian vehicles and for military force members, namely cameras, binoculars; infrared monitoring and tracking systems, namely infrared sensor for passive scanning; periscopes; target glasses, telescope, spotting scopes; gyro-stabilized sights; holographic sights; apparatus, equipment and instruments for automatic piloting for vehicles without a pilot for military and civilian use; equipment and instruments for remote control and command guidance in the field of aviation, namely electronic aircraft systems for communications, navigation, speed holding, turning holding, static pressure; remote measuring equipment and apparatus, namely sensors, web feed counters, data acquisition systems, transmitters, receivers, recorders; observation and recognition systems, namely airborne systems for land recognition and surveillance based on radar imagery consisting of thermal images, optronic balls, viewfinders, thermal cameras, laser sensors; control stations for airplane flights; antennas, namely device for emitting and monitoring electromagnetic waves; secured voice, data and information transmission systems, namely wired encrypted telephony and GSM, Internet transaction securing systems; heliborne surveillance systems, namely heliborne visors for military applications; radio relay transmission systems and secured networks, namely digital terminals for multi-biometry and for cryptology used in military applications; telecommunications terminals and encryption terminals; electronic equipment and instruments for communications (emission and receiving sounds, images and/or data), namely telephone sets, facsimile machines, radios, television sets, antennas, power lines, satellites, navigation electronic equipment and instruments for vehicles (on-board computers), namely GPS navigation system comprising of a CD-ROM for cartography, sensors for wheels, a gyroscope and a GPS antenna linked to satellites to give the exact location of the vehicle and electronic observation equipment and apparatus, namely binoculars, telescopes, spotting scope, all being for infantry soldiers and security personnel; thermal cameras; systems for day/night surveillance, namely GPS devices, screen monitors, cameras for coastal monitoring by helicopter or drone airplanes, air surveillance of borders, urban monitoring, search and rescue operations, environmental protection; systems for the digital transmission of images in real time; binoculars for day/night vision; batteries, accumulators for portable equipment for radio communication and navigation for civilian and military applications; apparatus for recharging electric accumulators; airborne surveillance systems, namely GPS devices, screen monitors, cameras enabling coastal monitoring by helicopter or drone airplanes, air surveillance of borders, urban monitoring, search and rescue operations, environmental protection; gyrostabilized and steerable optronic platform; target illuminator; geographical information production systems, namely satellite system, GPS, software, sensors; apparatus and equipment for acquiring, compressing, transmitting, analyzing and restoring satellite images and aerial photographs, namely computer programs; image transmission systems by radio digital connection for monitoring systems, namely cameras, video consoles; infrared and ultraviolet optical components, namely adaptative mirrors for lasers, adaptative mirrors for binoculars and telescopes; astronomic mirrors; space optics; air reconnaissance optics; optical metrology.

Class 12

(2) Land, aeronautical and astronautic vehicles; unmanned aircraft, drones, instrument panels, namely panels placed in front of an airplane pilot in which the dials or cathodic screens of main boarding instruments are inserted; flight yokes with integrated levers.

SERVICES

Class 35

(1) Collection of data in a central file, namely systematization of data in a central file, namely setting up, management and compilation of computer databases in the fields of aerospace, defence and civil security; compilation, management, processing and storage of data in computer databases in the fields of aerospace, defence and civil security.

Class 37

(2) Installation and repair services of electronic equipment to modernise airplanes, missiles, boats and submarines; maintenance and repair of aeronautical equipment; installation, maintenance and repair of terrestrial astronomy apparatus and instruments, opto-electronic apparatus and instruments for the laser, semiconductor and defence industries, in particular telescopes, mirrors, lenses.

Class 38

(3) Provision of access to databases through a computer network in the fields of aeronautics, space and defence; secure communication of aircraft flight data; transmission of information (telecommunication service) contained in a databank and/or on a server via an Internet and/or intranet access relating to the functioning of the engine and the flight trajectory recorded by the modules and equipment of an airplane, namely instrument panels, flight recorders from the cockpit to a computer database located on a server on the ground, all these services being used in and/or intended for the aeronautical and spatial fields; maintenance of a web portal provided for airlines.

Class 42

(4) Design (development) of computer software and computer hardware; design (developing) and development of computer hardware and computer software; development and design (developing) of computer software for navigation systems (GPS and satellite); development and design of computer software for defence information systems; conversion of computer programs and data; duplication of computer programs; installation and updating of computer software; design, arranging, provision, maintenance and export of computer software for information technology in the fields of aeronautics, space and defence; technical, scientific and industrial research in the fields of aeronautics, space and defence; engineering in the fields of aeronautics, space and defence; research and development (engineering work) in the fields of aeronautics, space and defence; technical data analysis in the fields of aeronautics, space and defence; engineering services related to evaluations, estimates and research in relation to the technology used in aeronautical and space vehicle systems, equipment and parts; consulting and professional advice related to engineering; technical consulting in the fields of aeronautics and defence (engineering work); operational engineering services for airlines.

Class 07

(1) Industrial machines in the fields of aeronautics and space, machine tools, machines for producing and repairing parts for use in the field of aeronautics, and in particular in aeronautical motorization systems, assembly lines for aircraft turbines, motors and engines, industrial robots, motorization systems for aeronautical vehicles, as well as their constituent parts and detached parts, including motors and engines, turbines, pumps, thrusters, reactors, engine air intakes, fan cases, exhaust cones; air compressors for power generators, compressors as parts of machines, motors and engines, compressors for motor vehicles, air compressors for vehicles, electric compressors, heat exchangers (machine parts), transmission and propulsion couplings and components, motors and engines of all kinds for fixed or mobile installations, in particular gas turbines, thermal engines, electrothermal engines, reactive engines, rocket engines for satellite launchers and for ballistic and tactical missiles, test benches for motors and engines, turbines and other thrusters (machines) for aircraft, all these products used and/or intended for the fields of aeronautics and space.

Class 09

(2) Scientific, optical, weighing, measuring, checking and inspection apparatus and instruments, namely apparatus and instruments for verifying and monitoring the functioning of aircraft motors and engines and their constituent parts, namely apparatus enabling the visual monitoring of parts, namely scanners, chemical fume detectors, radiographic apparatus for industrial use for analyzing materials and metals, namely scanners, variable-angle image detectors, touch screen displays, laser detectors, cameras, radiation detectors, camera adapters, camera batteries, digital cameras, camera memory cards, camera battery chargers, camera filters, waterproof packing for camera cases, camera flashes, camera lenses, camera shutters, camera lens hoods, camera mounts, camera tripods, laser pointers, altimeters, anemometers, variometers, accelerometers, aerodynamic sensors; electrical and electronic apparatus and instruments, in the nature of overhaul calculators, calculators for digitally regulating speed and fuel flow (FADEC), calculators for braking, temperature, pressure, vibration analysis, flight control, electric, electronic and magnetic sensors for pressure, speed, movement, temperature, position, vibration; electronic parameter processing cards, namely reading cards to be used with computers for connecting to a computer server for information in the fields of aeronautics and space; electronic systems and

equipment, integrated or not, for data processing and acquisition, namely sensors, regulators, converters, transformers, calculators in the fields of aeronautics and space; calculation and operation software for the simulation, operation and storage of test programs; surveillance systems consisting of computer hardware and software for evaluating security and performance as well as maintenance and servicing requirements for aircraft engines and/or their modules and parts; electric and electronic maintenance and control materials and equipment (integrated into airplanes or motors and engines, mounted on test benches or portable for ground interventions) for reading and interpreting data from calculators and sensors; information processing apparatus, namely computers, computer keyboards, computer screens, mice, printers, modems, telephones, cellular telephones; apparatus for the recording, transmission, reproduction of sound, images and data, namely audio and video disc players, audio and video disc recorders, radios, audio and video receivers, audio and video cassette players/recorders, televisions; computer software, in particular computer software and programs providing information about aircraft engines, the functioning, maintenance, intervention, repair related to aircraft engines and/or their modules and parts; computer software for managing the functioning and repair, servicing, maintenance, overhaul and reconditioning operations performed on aircraft engines and/or their modules and parts; magnetic, optical and digital recording media, namely discs, video discs, optical discs, DVDs, CDVs, laser discs, USB keys; test benches for aircraft engines, turbines and thrusters, all the aforesaid goods used in or intended for the fields of aeronautics and space.

Class 12

(3) Aeronautical vehicles, including aircraft and helicopters, and their constituent parts and detached parts.

SERVICES

Class 35

(1) Assistance in the management and operation of industrial or commercial businesses possessing an aircraft fleet; consulting services related to the commercial management of a fleet of aircraft engines, systems, equipment and parts; consulting services related to the administrative and commercial management of the repair, overhaul, servicing, standardization, maintenance of aircraft engines, systems, equipment and parts; business consulting services related to the determination and choice of tools in the field of repair, overhaul, maintenance, standardization, up-keep of aircraft engines, systems, equipment and parts; administrative and commercial management of replacement materials for users of aircraft engines, systems, equipment and parts; compilation and statistical study of data related to managing the maintenance of an aircraft engine fleet; collection of data in a central file, namely systematization of data in a central file, namely constitution, management, and compilation of computer databases in the fields of aerospace, defence and civil security; business data analysis, compilation, management, treatment, and storage of data into computer databases in the fields of aerospace, defence and civil security; use of commercial data; operation of commercial data banks; provision of statistical information in a computer database in the fields of aerospace, defence and civil security.

Class 36

(2) Insurance, financial and monetary affairs, namely financial evaluation for insurance purposes, asset management, analysis and expertise in financial affairs, namely consulting and auditing related to risk management for airlines and aircraft operators, studies and creation of financial projects intended for the fields of aeronautics and space, as well as providing consulting and assistance, financial engineering, loans (financing) for systems, equipment and parts for aircraft, financial services regarding the rental of systems, equipment and parts for aircraft, insurance

services for systems, equipment and parts for aircraft, warranty services for systems, equipment and parts for aircraft, rental-purchasing services (leasing) of systems, equipment and parts for aircraft, all these services intended for the fields of aeronautics and space.

Class 37

(3) Repair and maintenance of aircraft and their constituent parts; construction and installation of industrial buildings and test benches for systems, equipment and parts for aircraft; repair of electric and electronic apparatus, instruments, systems, materials, and equipment used in the field of aerospace; repair, servicing, upkeep, and maintenance services for systems, equipment and parts of aircraft and their constituent parts, including motors and engines, turbines, engine nacelles, reactors, thrusters, thrust reversers, brake systems, landing systems, wiring; repair, overhaul, maintenance and on-wing maintenance services for all types of aircraft systems, equipment and parts; standardization, reconditioning, and standard replacement of aircraft systems, equipment, and parts; online assistance available 24 hours a day and 7 days a week related to repair, servicing, reconditioning, maintenance, upkeep and standard replacement for systems, equipment and parts for aircraft; technical advice and assistance regarding the manufacture, maintenance, repair, and servicing of aircraft and their constituent parts, including motors and engines, turbines, engine nacelles, reactors, thrusters, thrust reversers, aircraft, brake systems, landing systems, wiring; repair of tooling and ancillary equipment for systems, equipment and parts for aircraft.

Class 38

(4) Provision of access to databases through a computer network in the fields of aeronautics and space, transmission of information (telecommunication service) contained in a databank and/or in a server via access to the Internet and/or an intranet concerning the functioning of the engine and the flight trajectory recorded by the modules and equipment of an airplane, namely instrument panels, flight recorders from the cockpit to a computer database located on a server on the ground, rental of access time to a database server centre, all these services being used by and/or intended for the field of aeronautics.

Class 42

(5) Technical, scientific and industrial research in the fields of aeronautics and space; engineering in the fields of aeronautics and space; research and development (engineering work) in the fields of aeronautics and space; technical data analysis in the fields of aeronautics and space; engineering services related to evaluations, estimates and research in relation to the technology used in aeronautical and space vehicle systems, equipment and parts; consulting and professional consultation services related to engineering for the benefit of others in the fields of aeronautics, astronautics, space (rocket for spatial use, helicopters, satellites and missiles/drones), communications, defence and security for civilian, military, and space markets; technical consulting in the field of aeronautics (engineering work); operational engineering services for airlines; analysis and consulting provided by engineers in relation to aircraft fuel consumption and saving; consulting services related to the technical management of aircraft engine fleets, systems, equipment, and parts; testing of machines and materials in the fields of aeronautics and space; construction of test cells (temporary buildings with reduced dimensions or not) for propulsion units, systems (rocket engines and aircraft engines), equipment and parts of aeronautical and space vehicles, and rocket engines; inspection and monitoring services for aircraft engines, systems, equipment, and parts; computer software development and design, computer programming; analysis, expertise related to aircraft equipment and parts; acquisition and unloading of aircraft flight data; analysis, expertise and processing services for the acquisition of data recorded on running aircraft engines, systems, equipment and parts; maintenance of a web portal provided for airlines, operational engineering services for airlines; technical project studies related to

aeronautical vehicles and their constituent parts, including motors and engines, engine nacelles, reactors, thrusters or thrust reversers. .

Class 06

(1) Metals, metal alloys intended for the manufacturing of parts, components, parts for aircraft, intended for the manufacturing of parts, components, landing gear parts, intended for shipbuilding and space building; common metals and their alloys.

Class 07

(2) Industrial machines in the fields of aeronautics and space, machine tools, machines for producing and repairing parts in the fields of aeronautics and space; industrial robots; motors and engines, actuators, reducers, transmissions for moving, guiding, slowing down, immobilizing an aircraft during taxiing or during the pre-takeoff phase or the post-landing phase; motors and engines, actuators, reducers, transmissions for turning one or more aircraft wheels for moving, guiding, slowing down, immobilizing the aircraft during taxiing or during the pre-takeoff phase or the post-landing phase.

Class 09

(3) Electronic devices for the analysis, management, monitoring and control of aircraft landing gear components; computer devices for the analysis, management, monitoring and control of aircraft landing gear components; solar batteries, galvanic batteries, high tension batteries, all-purpose batteries; capacitors, devices, electronic components for the collection, storing and restoration of energy production during the taxiing of an aircraft, during the pre-landing or post-landing phase, or during the pre-takeoff phase; software for moving, guiding, braking, immobilizing an aircraft during taxiing or the pre-landing phase; software for analyzing, managing, monitoring, and controlling of aircraft landing gear components; scientific, optical, weighing, measuring, checking and inspection apparatus and instruments, namely apparatus and instruments for verifying and monitoring the functioning of aircraft motors and engines and their constituent parts, namely apparatus enabling the visual monitoring of parts, namely scanners, chemical fume detectors, radiographic apparatus for industrial use for analyzing materials and metals, namely scanners, variable-angle image detectors, touch screen displays, laser detectors, cameras, radiation detectors, camera adapters, camera batteries, digital cameras, camera memory cards, camera battery chargers, camera filters, waterproof packing for camera cases, camera flashes, camera lenses, camera shutters, camera lens hoods, camera mounts, camera tripods, laser pointers, altimeters, anemometers, variometers, accelerometers, aerodynamic sensors; electric and electronic apparatus and instruments, namely

overhaul calculators, digital speed regulation and fuel flow calculators (FADEC), braking calculators, temperature calculators, pressure calculators, vibration analysis calculators, flight control calculators; electric, electronic and magnetic sensors for pressure, speed, movement, temperature, position, vibration; electronic cards for parameter processing, namely reader cards to be used with computers for connecting to a computer server for information in the fields of aeronautics and space; integrated or non-integrated electronic systems and equipment for data acquisition and processing; calculation and operation software for the simulation, operation and storage of test programs; electric and electronic maintenance and control materials and equipment (integrated into airplanes or engines, mounted to test benches, or portable for ground interventions) for reading and interpreting calculator and sensor data; apparatus for the recording, transmission, reproduction of sound, images, and data, namely audio and video disc players, audio and video disc recorders, radios, audio and video receivers, audio and video cassette players /recorders, televisions; computer software, in particular computer software and programs providing information about aircraft engines, operation, maintenance, work, repair related to aircraft engines and their modules and parts.

Class 12

(4) Parts of aircraft; parts of landing gear; boats; spaceships; parts of spaceships; friction, damping, clutching and or braking devices for air vehicles; devices for moving, guiding, slowing down, immobilizing an aircraft during taxiing or during the pre-takeoff phase or the post-landing phase; devices for the analysis, management, monitoring and control of aircraft landing gear components; device for cooling the aircraft landing gear components or the components enabling the operation, analysis, managing, monitoring, controlling, moving, guiding, slowing down, immobilization of an aircraft during taxiing or during the pre-takeoff phase or the pre-takeoff phase.

SERVICES

Class 37

(1) Maintenance and servicing of air vehicles and parts thereof; assistance services in the nature of corrective maintenance in the case of air vehicle breakdowns or in the event of the break or the malfunction of a component or of a set of parts of said vehicles; assistance services in case of air vehicle breakdowns or in the event of the break or the malfunction of a component or of a set of parts said vehicles consisting of the lending or the exchange of parts or of sets of parts of air vehicles; repair services of air vehicles and parts thereof; replacement services, namely replacing air vehicle parts with better performing parts in the context of a maintenance contract of such parts; information and consulting in the field of maintenance, servicing, repair and replacement services of air vehicles and parts thereof; information and consulting in the field of maintenance, servicing, repair and replacement services of air vehicles and parts thereof for optimizing the availability of air vehicles and for reducing their immobilization time; maintenance, repair and servicing of landing gear and braking devices.

Class 42

(2) Technical, scientific and industrial research in the fields of aeronautics and space; research and development (engineering work) in the fields of aeronautics and space; technical data analysis in the fields of aeronautics and space; engineering services related to evaluations, estimates and research in relation to the technology used in aeronautical and space vehicle systems, equipment and parts; testing of machines and materials in the fields of aeronautics and space; computer software development and design, computer programming; analysis, expertise related to aeronautical and space vehicle equipment and parts; acquisition and unloading of aircraft flight data; analysis, expertise and processing services for the acquisition of data recorded on running

aircraft engines, systems, equipment and parts; design and development of computers and computer software in the field of maintenance and servicing services of air vehicles and parts thereof; installation, maintenance, updating or rental of computer software in the field of maintenance and servicing services of air vehicles and parts thereof; control and checking services of air vehicles and parts thereof in the context of a maintenance contract of such parts.

temperature calculators, pressure calculators, vibration analysis calculators, flight control calculators; electric, electronic and magnetic sensors for pressure, speed, movement, temperature, position, vibration; electronic cards for parameter processing, namely reader cards to be used with computers for connecting to a computer server for information in the fields of aeronautics and space; electronic systems and equipment, integrated or not, for data acquisition and processing, namely sensors, regulators, converters, electrical transformers, calculators in the fields of aeronautics and space; calculation and operation software for the simulation, operation and storage of test programs; monitoring systems consisting of computer hardware and software for evaluating security and performance as well as maintenance and servicing requirements for aircraft engines and or their modules and parts; electric and electronic maintenance and control materials and equipment (integrated into airplanes or engines, mounted to test benches, or portable for ground interventions) for reading and interpreting calculator and sensor data; apparatus for the recording, transmission, reproduction of sound, images, and data, namely audio and video disc players, audio and video disc recorders, radios, audio and video receivers, audio and video cassette players/recorders, televisions; computer software, in particular computer software and programs providing information about aircraft engines, operation, maintenance, work, repair related to aircraft engines and their modules and parts; computer software, in particular computer software and programs providing information about aircraft engines and about the functioning, maintenance, procedures, repairs related to aircraft engines and their modules and parts; computer software for managing the functioning, repair, overhauling, servicing, maintenance and reconditioning operations performed on aircraft engines and their modules and parts; electrical wiring; electric cables; industrial cables (electric); fire safety cables (electric); telecommunication cables (electric); fibre optic cables; optical fibres; connecting material electrical and optical cables; electrical distribution apparatus and instruments; electrical converters; protective sheaths for electric cables, electrical harnesses, in the nature of electric wiring harnesses, electric connectors; electrical current switchers; electrical current commutators; circuit breakers; electric contactors, in the nature of temperature controlling apparatus; current transformers; current rectifiers and converters; measuring, controlling and signalling electric apparatus, namely radars, airborne radars, pilot line of sight detectors, inter-aircraft monitoring and communication, anti-collision and landform avoidance systems, distress beacons, on-board aircraft emergency handsets, beacon lights, light signal transmitters, luminous signs, luminous signs; electric couplings, namely cables and wires for connecting electric apparatus; electric accumulators; electric remote ignition devices; electrical control boxes, namely electricity distribution boxes; power generators, current generators, electric generators; turbine generators; electric starters, starter alternators, engine starters; test benches for aircraft engines, turbines, and thrusters, all of the aforesaid goods being used in and intended for the fields of aeronautics and space.

Class 11

(3) Aircraft ventilation installations, cooling systems for aircraft systems, modules, apparatus, and equipment.

SERVICES

Class 37

(1) Repair, servicing, reconditioning, adaptation, modifying, maintenance and upkeep of electric installations and electrical wiring used in the fields of aeronautics, space, rail operations and defence; repair, maintenance and upkeep of electric and electronic apparatus, instruments, systems, material and equipment used in the fields of aeronautics, space, rail operations and defence; installation and repair of electrical equipment for modernising airplanes, missiles, boats; assistance service related to the repair, reconditioning, maintenance and upkeep of electric

installations and electrical wiring used in the fields of aeronautics, space, rail operations and defence; assistance service related to the repair, maintenance and upkeep of electric and electronic apparatus, instruments, systems, material and equipment used in the fields of aeronautics, space, rail operations and defence; assistance service related to the installation and repair of electrical equipment for modernising airplanes, missiles, boats.

Class 42

(2) Professional advisory and consultancy services related to engineering in the fields of aeronautics, space, rail operations and defence; engineering work, namely technical consulting in the fields of aeronautics, space, rail operations and defence; engineering services related to evaluation, estimation and research in relation to technology used in aeronautic and space vehicle systems, equipment, and parts in the fields of aeronautics, space, rail operations and defence; engineering and technical advice services related to evaluation, estimation and research related to technologies used in the fields requiring electric energy; technical data analysis in the fields of aeronautics, space, rail operations and defence; testing of machines and materials in the fields of aeronautics, space, rail operations and defence; computer software development and design, computer programming; acquisition and unloading of aircraft flight data; analysis, expertise, and processing of the acquisition of data recorded during the operation of aircraft engines, systems, equipment, and parts (engineering work).

Goods

Class 07

(1) Industrial machines in the fields of aeronautics and space, machines for the production of composite or non-composite parts in the fields of aeronautics and space, precision machining and bar turning machines in the fields of aeronautics and space, and machine tools, machines for the production and repair of parts for use in aeronautical and space propulsion systems (turbojet engines, ramjet engines, pulsejet engines, rocket propulsion engines), assembly lines for aircraft engines, industrial robots, hydrazine thrusters, bipropellant thrusters, power-augmented catalytic thrusters, ion thrusters, electric thrusters, plasma thrusters, propulsion systems for aeronautical and space vehicles, as well as their constituent parts and detached parts, including motors and engines, turbines, pumps, thrusters, reactors, nacelles, thrust reversers, engine air intakes, fan cases, exhaust cones, air compressors for power generators, compressors as parts of machines, motors and engines, compressors for motor vehicles, air compressors for vehicles, electric compressors, heat exchangers (machine parts), transmission and propulsion couplings and components, motors and engines of all kinds for fixed or mobile installations, in particular gas turbines, thermal engines, electrothermal engines, reactive engines, nuclear power engines, combined propulsion engines, rocket propulsion engines, cryogenic rocket engines, rocket engines for satellite launchers and for ballistic and tactical missiles, propellant tanks, surface tension tanks, test benches for motors and engines, turbines and other thrusters (machines) for aircraft, all these products used and/or intended for the fields of aeronautics and space.

Class 09

(2) Scientific, optical, weighing, measuring, checking and inspection apparatus and instruments, namely apparatus and instruments for verifying and monitoring the functioning of aircraft motors and engines and their constituent parts, namely apparatus enabling the visual monitoring of parts, namely scanners, chemical fume detectors, radiographic apparatus for industrial use for analyzing materials and metals, namely scanners, variable-angle image detectors, touch screen displays, laser detectors, cameras, radiation detectors, camera adapters, camera batteries, digital cameras, camera memory cards, camera battery chargers, camera filters, waterproof packing for camera cases, camera flashes, camera lenses, camera shutters, camera lens hoods, camera mounts, camera tripods, laser pointers, altimeters, anemometers, variometers, accelerometers, aerodynamic sensors, electrical and electronic apparatus and instruments, in the nature of

overhaul calculators, calculators for digitally regulating speed and fuel flow (FADEC), calculators for braking, temperature, pressure, vibration analysis, flight control, electric, electronic and magnetic sensors for pressure, speed, movement, temperature, position, vibration, electronic parameter processing cards, namely reading cards to be used with computers for connecting to a computer server for information in the fields of aeronautics and space, electronic systems and equipment, integrated or not, for data processing and acquisition, namely sensors, regulators, converters, transformers, calculators in the fields of aeronautics and space, calculation and operation software for simulating the, operation and storage of test programs, surveillance systems consisting of computer hardware and software for evaluating security and performance as well as maintenance and servicing requirements for aircraft engines and/or their modules and parts, electric and electronic maintenance and control materials and equipment (integrated into airplanes or motors and engines, mounted on test benches or portable for ground interventions) for reading and interpreting data from calculators and sensors, information processing apparatus, namely computers, computer keyboards, computer screens, mice, printers, modems, telephones, cellular telephones, apparatus for the recording, transmission, reproduction of sound, images and/or data, computer software, in particular computer software and programs providing information about aircraft engines, the functioning, maintenance, intervention, repair related to aircraft engines and/or their modules and parts, computer software for managing the functioning and repair, servicing, maintenance, overhaul and reconditioning operations performed on aircraft engines and/or their modules and parts, magnetic, optical and digital recording media, namely discs, video discs, optical discs, DVDs, CDVs, laser discs, USB keys, data banks, containing, in particular, information regarding aircraft engines, their functioning, repair, servicing, maintenance, overhaul and reconditioning of engines, modules and parts of aircraft engines, test benches for aircraft engines, turbines and thrusters, all these goods used in or intended for the fields of aeronautics and space.

Class 12

(3) All aeronautical, astronautical vehicles, including aircraft and airplanes; detached parts and pieces for aeronautical vehicle cockpits; nacelles for engines, reactors and thrusters for aeronautical vehicles; space launchers, rockets for space use, space shuttles for use in space equipped with hypersonic means of propulsion; friction, damping, clutching and/or braking devices for air vehicles.

SERVICES

Class 35

(1) Consulting services related to the organization, administrative and commercial management, and industrial manufacturing of industrial or commercial businesses that own an aircraft fleet; consulting services related to the administrative management of aircraft engine fleets, systems, equipment, and parts; consulting related to the administrative and commercial management and the methods used in the context of repairing, overhauling, servicing, standardizing, maintaining systems, equipment, and parts for aeronautical and space vehicles; consulting related to the identification and choice of tools in the fields of repairing, overhauling, servicing, standardizing, maintaining systems, equipment, and parts for aeronautical and space vehicles; administrative and commercial management of parts, replacement materials for users of aircraft engines, systems, equipment, and parts; market studies and research in the field of aeronautics; compilation and statistical study of data related to the management of a fleet comprising systems, equipment, and parts for vehicles aeronautical and space vehicles and to the management of the maintenance of an aircraft fleet; consulting services related to the administrative organization and management of air operations, in the nature of tactical and/or strategic military or non military operations conducted

by aerial means; collection of data in a central file, namely systematization of data in a central file, namely constitution, management, and compilation of computer databases in the fields of aerospace, defence and civil security; business data analysis, compilation, management, treatment, and storage of data into computer databases in the fields of aerospace, defence and civil security; exploitation of statistical data in the fields of aerospace, defence and civil security; provision of statistical information in a computer database in the fields of aerospace, defence and civil security.

Class 36

(2) Rental-purchasing (leasing) of systems, equipment, and parts for aeronautical and space vehicles; online 24/7 technical consulting, information, and assistance (consulting) related to the rental-purchasing (leasing) of aeronautic and space vehicle systems, equipment, and parts; consulting related to the management of aircraft engine fleets, systems, equipment, and parts; insurance; financial affairs; monetary affairs; consulting, estimates, analysis, and expertise in financial affairs; analysis of financial data; study and development of financial projects and provision of consulting and support in this field; auditing consulting related to risk management and quality assurance for airlines and aircraft operators, financial engineering; file preparation for financing purposes; coaching of financial projects, in the nature of census of French, European, and foreign organizations offering financial aid, identification of the type of aid offered for national, European, and international requests for proposals; loans (financing) for aircraft systems, equipment, and parts; financial services related to the rental of aircraft systems, equipment, and parts; insurance services for aircraft systems, equipment and parts; warranty services for aircraft systems, equipment and parts; all these services intended for the fields of aeronautics and space.

Class 37

(3) Construction of permanent buildings for aeronautical and astronautical vehicles, space launchers, aircraft and their constituent parts, including propulsion systems for aeronautical vehicles, motors and engines, thrusters, nacelles, thrust reversers; installation, repair and maintenance of aeronautical and astronautical vehicles, space launchers, aircraft and their constituent parts, including propulsion systems for aeronautical vehicles, motors and engines, thrusters, nacelles, thrust reversers; construction of industrial buildings and testing ranges (permanent buildings with reduced dimensions or not) for propulsion units, systems (rocket engines and aircraft engines), equipment and parts of aeronautical and space vehicles, and rocket engines; repair and reconditioning of aeronautical engines and space propulsion units; administrative and commercial management of parts, replacement materials for users of aircraft engines, systems, equipment, and parts; installation, repair and maintenance of all types of aeronautical vehicles, astronautic vehicles, all types of aircraft engines, inverters and aircraft engines nacelles, space launchers, landing gear, aeronautic equipment, hydraulic and electro-hydraulic equipment and systems, wheels, brakes, vehicle suspensions, screw-propellers and their constituent parts; under-wing repair, overhaul, servicing, and maintenance for all propulsion units and systems, equipment, and parts for aeronautical and space vehicles; standardization, reconditioning, and standard replacement for engines, propulsion units, systems, equipment, and parts for aeronautical and space vehicles; consulting related to the identification and choice of tools in the fields of repairing, overhauling, servicing, standardizing, maintaining systems, equipment, and parts for aeronautical and space vehicles; online assistance available 24 hours a day and 7 days a week related to repair, servicing, reconditioning, maintenance, upkeep and standard replacement for motors and engines, propulsion units, systems, equipment and parts for aeronautical and space vehicles; consulting and technical support services related to the maintenance, repair, and servicing of aeronautical vehicles and their constituent parts, including nacelles motors and engines, reactors, thrusters or thrust reversers; consulting services related to

the repair, servicing, maintenance, standardization, on-wing maintenance of all types of motors, systems, equipment, and parts for aircraft.

Class 38

(4) Emission, transmission, and reception of information contained in a computer and electronic database and on a server via Internet and intranet access in relation to the functioning of the engine and the flight trajectory recorded by the modules and equipment of an airplane, namely instrument panels, flight recorders in the cockpit toward a computer database located on a server on the ground; provision of access to databases through a computer network in the fields of aeronautics and space; dissemination of information on networks, in particular on the Internet through a computer database in the fields of aeronautics and space; secured communication of data related to security and performance assessment, as well as requirements for maintenance and servicing of aircraft engines and/or their modules and parts.

Class 39

(5) Rental of all kinds of aeronautic and space vehicle systems, equipment, and parts, secured communication of data related to aircraft flights, secured storage of data related to aircraft flight, all of these services used and/or intended for the fields of aeronautics and space.

Class 40

(6) Material treatment, namely for a third party, by mechanical or chemical means of aeronautical vehicles and their constituent parts, including motors and engines, engine nacelles, reactors, thrusters or thrust reversers, aeronautical vehicles, thermal treatment of metals and metallic alloys, physicochemical operations or treatments for providing protection against the oxidization or corrosion of non metallic composite materials, all of these services used and/or intended for the fields of aeronautics and space.

Class 41

(7) Education and professional training in the fields of aeronautics and space; arranging and holding internships, colloquia, seminars, conferences, symposia, and conventions in the fields of aeronautics and space; publishing of books, journals, newspapers, periodicals, publications and printed matter.

Class 42

(8) Technical, scientific and industrial research in the fields of aeronautics and space; engineering in the fields of aeronautics and space; research and development (engineering work) in the fields of aeronautics and space; technical data analysis in the fields of aeronautics and space; engineering services related to evaluations, estimates and research in relation to the technology used in aeronautical and space vehicle systems, equipment and parts; consulting and professional advice related to engineering; technical consulting in the field of aeronautics (engineering work); operational engineering services for airlines; analysis and consulting provided by engineers in relation to aircraft fuel consumption and saving; consulting services related to the technical management of aircraft engine fleets, systems, equipment, and parts; consulting related to the technical organization and management of air operations, in the nature of tactical and/or strategic military or non military operations conducted by aerial means; technical consulting related to the methods to be applied in the commercial management and replacement of systems, equipment, and parts for aeronautical and space vehicles; technical consulting related to the methods to be applied in the context of the repairing, overhauling, servicing, standardizing, maintaining of propulsion units, systems, equipment, and parts for aeronautical and space vehicles; testing of machines and materials in the fields of aeronautics and space; construction of test cells (temporary buildings with reduced dimensions or not) for propulsion units, systems (rocket engines and

aircraft engines), equipment and parts of aeronautical and space vehicles, and rocket engines; inspection and monitoring services for aircraft engines, systems, equipment, and parts; computer software development and design, computer programming; analysis, expertise related to aeronautical and space vehicle equipment and parts; acquisition and unloading of aircraft flight data; analysis, expertise and processing services for the acquisition of data recorded on running aircraft engines, systems, equipment and parts; maintenance of a web portal provided for airlines, operational engineering services for airlines; technical project studies related to aeronautical vehicles and their constituent parts, including motors and engines, engine nacelles, reactors, thrusters or thrust reversers, aeronautical vehicles.

Goods

(1) Ungluing preparations for adhesives, namely, chemical preparations in the nature of adhesive de-bonding agents for use in the building and construction industry; alkaline ionized water for use as industrial detergents; cyclohexane; sealing preparations, namely, industrial adhesives for use in sealing and for use in the building and construction industry; industrial chemicals, namely, chemicals for use in the manufacture of adhesives, detergents for industrial use; surface-active chemical agents for removing spots and stains for use on wallpapers, flooring materials and fabrics; contact cements; glue and adhesives for carpets; adhesives for flooring; glue and adhesives for use in the building and construction industry; putty oil cement for coating; putty oil cement primer; putty oil cement.

(2) Masking tape for industrial purposes; vinyl sheets for use in the construction of building panels and coverings for general industrial use; plastic films for use on building glass; heat shielding plastic films for use on glass; adhesive-coated plastic films for use in decoration; heat insulating plastic films for use on glass; semi-worked plastics, namely, plastic in the form of boards, plates, tapes, strips, pipes, tubes, film, rods and bars for general industrial or manufacturing use; semi-processed plastics in the form of plastic tape for use in decorating walls, floors and other building surfaces; sealant compounds for joints; caulking compounds; sealants for building materials, namely, rubber-based sealants for walls, floors and other building surfaces, resin-based sealants for walls, floors and other building surfaces; putty as building materials, namely, patching compounds made of rubber or resin for use in surface preparation of walls prior to the application of wallpapers; polyurethane foam panels for use in the construction of walls.

(3) Imitation leather; rawhides; raw skins; tanned leather.

(4) Non-metallic minerals for building or construction; ceramic building materials, namely, ceramic tiles, flooring and slabs; bricks and refractory products, namely fired bricks, unfired bricks, terra cotta, ceramic roofing tiles, ceramic tiles; plastic building materials, namely veneers for use in decorating walls for building or construction; rubber building and construction materials, namely, tiles for use on indoor and outdoor floors; non-metal portable warehouse buildings; cement and its products, namely, concrete pipes, concrete poles and concrete blocks; building timber; building stone; vinyl interior walls for use in building or construction for decoration; fleece sheets, namely, non-woven textiles made of synthetic fibres for use in the building and construction industries; sheets of wood for building purposes; wall boards for building purposes (not of metal); building glass; vinyl flooring; vinyl floor tiles; non-metallic building materials for wooden flooring, namely, wooden floor boards; slabs, not of metal, for building; ceramic building materials, namely ceramic tiles; coverings of ceramic for surfaces of furniture; putty as building materials, namely, spackling compounds for use in surface preparation of walls, floors and other building surfaces; adhesive curing tapes for building purposes; building materials, namely, non-metal wall panels; building materials, namely, non-metal building panels made of glass, concrete, plastic, and wood for walls, ceilings, and floors; decorative moldings, not of metal, for building; wood trim baseboards; fireproof decorative boards of melamine resin; building panels of stone; decorative glass for building; partitions made of glass for building; glass panels; glass panels for building; building glass for walls; building glass for use as materials in wall construction.

(5) Indoor blinds; blinds of reed, rattan or bamboo (sudare); bead curtains for decoration; window shades; curtain rails; curtain fittings, namely, curtain rods, curtain rings, curtain hooks; metal-substitute plastic fasteners, namely, plastic fasteners for holding interior window shades; furniture cushions; Zabuton, namely, Japanese floor cushions; pillows; mattresses; cushions made from Japanese paper; furniture, namely, office furniture, bedroom furniture, bathroom furniture, living room furniture, dining room furniture, garden furniture, kitchen furniture, outdoor furniture, school furniture; indoor roll screen blinds.

(6) Woven fabrics, namely, cotton fabrics, hemp yarn fabrics, silk fabrics, wool yarn fabrics, chemical fiber fabrics, inorganic fiber fabrics, mixed fiber fabrics, mixed yarn fabrics, narrow woven fabrics, and paper yarn fabrics for textile use; seat covers of textile; wall hangings of textile; curtains; non-paper table cloths; draperies, namely, thick drop curtains; oilcloth; gummed waterproof cloth; vinyl coated cloth; rubberized cloth; leather cloth, namely, cloth processed with leather and synthetic leather; curtain tie-backs, namely, textile curtain holders, curtain pelmets of textile or plastic; light shielding curtains; style curtains; sofa covers; drape curtains; seat covers of vinyl; bedspreads; lace curtains; curtain fabrics; woven fabrics, namely, cotton fabrics, hemp yarn fabrics, silk fabrics, wool yarn fabrics, chemical fiber fabrics, inorganic fiber fabrics, mixed fiber fabrics, mixed yarn fabrics, narrow woven fabrics, and paper yarn fabrics, for use in upholstering seat cushions; bed covers; knitted fabrics; felt and non-woven textile fabrics; shower curtains of textile or plastic.

(7) Tapes, namely, hem tape, seam tape for sewing purposes, tapes for curtain headings; ribbons; knitted raschel lace fabrics; embroidery lace fabrics; semi-finished decorative tufts and tassels for cushions and curtains.

(8) Tatami mats made of Japanese paper; floor mats made of Japanese paper; floor mats of paper; goza rush mats; Tatami mats, namely, Japanese rice straw mats; Hana-mushiro, namely, rush mats with floral patterns; mushiro, namely, straw mats; straw mats; carpet tiles for covering floors; tapestry-style wall hangings made of Japanese paper, not of textile; carpets; floor coverings, namely, carpets, rugs, vinyl floor tiles; non-textile wall hangings; wallpaper of vinyl; wallpaper of diatomaceous earth; wallpaper of fireproof materials; wallpaper for use in decorating vinyl wall coverings; wallpaper for use in decorating fleece wall coverings; wallpaper of fleece; wall coverings of paper; textile wallpaper; wallpaper; decorative, flexible and semi-finished vinyl sheets for use in decorating existing walls for the purpose of architectural embellishment; decorative, flexible and semi-finished fleece sheets for use in decorating existing walls for the purpose of architectural embellishment; building materials made of linoleum, namely veneers for fixing to existing walls or floors.
